## **DETAILED ACTION**

### ***Reasons For Allowance***

1. Claims 30-49 are allowed.

2. The following is an Examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claimed invention of self-organization of multidimensional data, as claimed by Applicant. Specifically, independent claims 30 and 40 disclose a training module containing means of equalizing and orthogonalizing the output signal of a neural layer.

The closest prior art of Pao et al (U.S. Patent Number 6,134,537; dated 17 OCT 2000; class 706; subclass 16) teaches a training module containing means of equalizing and orthogonalizing the output signal of a neural layer, but Applicant has filed a terminal disclaimer regarding that application. To the extent that the features cited above are not in any of the prior art cited by Examiner, the present case is held over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
